

ENTERPRISE RESOURCE PLANNING SYSTEM

FROM DATA TO DECISIONS

SIMPLIFYING OPERATIONS

AND MAXIMIZING PERFORMANCE

The Right Path To Business Excellence

ABOUT AGES ENTERPRISE RESOURCE PLANNING

❖ AgES ERP is a comprehensive, web-based solution designed to manage and streamline end-to-end business operations across departments.

❖ The system automates core processes including procurement, inventory, production, sales, finance and human resources to improve efficiency and reduce manual effort.

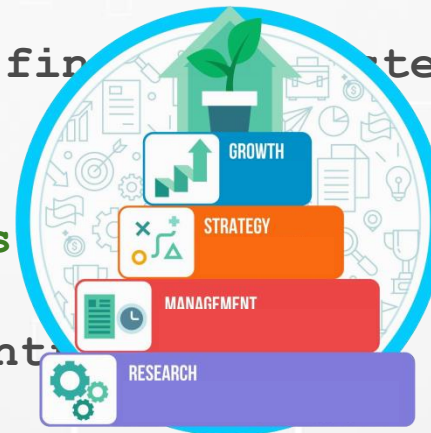

❖ Provides centralized control across multiple units, plants, and departments with complete visibility into operations, resource utilization, and business performance.

❖ Seamlessly integrated with key business functions including material management, production planning, quality control, and financial systems to ensure accuracy and data consistency.

❖ Enabled with dashboards, workflows and decision-making,

transparency and operational control.

notifications to enhance

WHY CHOOSE AGES ENTERPRISE RESOURCE PLANNING SOLUTIONS

CORE MODULES

⚙️ **MATERIAL MANAGEMENT** – Inventory control, stock tracking and material flow.

⚙️ **PURCHASE MANAGEMENT** – Procurement planning, vendor management and purchase orders.

⚙️ **PRODUCTION PLANNING** – Scheduling & production execution.

⚙️ **QUALITY MANAGEMENT** – Inspection, compliance and quality control.

MATERIAL MANAGEMENT

A comprehensive module that streamlines and controls the complete material lifecycle from procurement, receipt, storage, and issue to consumption, ensuring accurate inventory tracking, reduced wastage and improved operational efficiency.

KEY FEATURES

✓ Procurement & Purchase Management

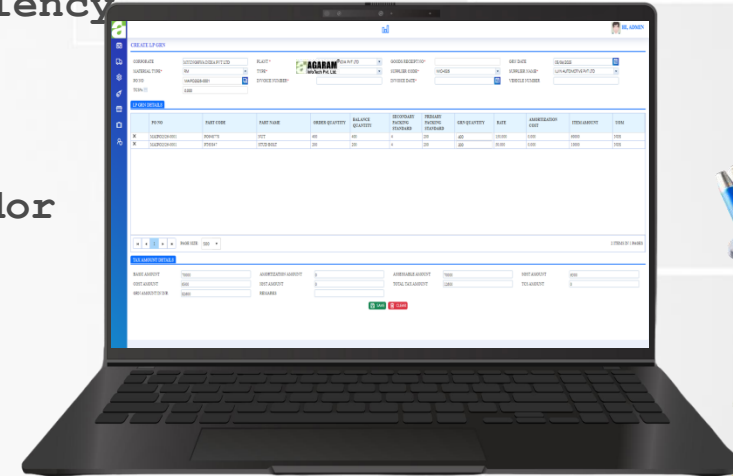

- Manage purchase requests, purchase orders, and vendor details
- Structured approval workflow for procurement processes

✓ Inventory & Stock Management

- Real-time stock visibility across locations, branches and warehouses
- Minimum stock and reorder level management to avoid shortages

✓ Goods Receipt & Storage

- Efficient GRN process with batch-wise and location-

PRODUCTION MANAGEMENT

A structured module that enables efficient production scheduling and shop floor control, ensuring optimal resource utilization, reduced downtime, and timely execution of production activities.

KEY FEATURES

✓ Production Planning

- Plan daily and monthly production activities
- Schedule production based on operational requirements

✓ Shop Floor Control

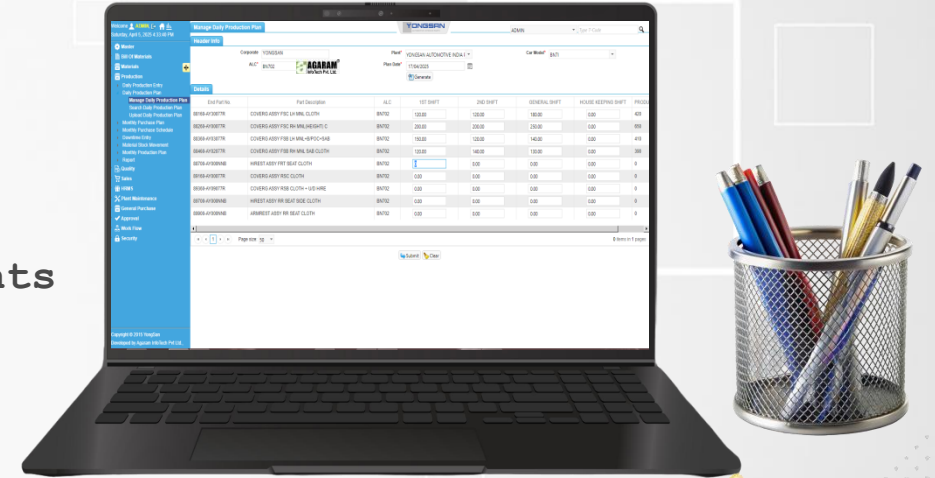

- Track production across machines, shifts and work centers
- Monitor work-in-progress and finished goods

✓ Production Coordination

- Align production activities with material availability
- Manage production schedules and execution flow

✓ Production Tracking

- Capture daily production entries and output details

QUALITY MANAGEMENT

A comprehensive module to ensure quality control at every stage of operations, from incoming materials to final product inspection, maintaining compliance with industry standards

KEY FEATURES

✓ Incoming Inspection

- Perform quality checks on incoming materials
- Record inspection results and acceptance criteria

✓ In-Process Line Quality Control

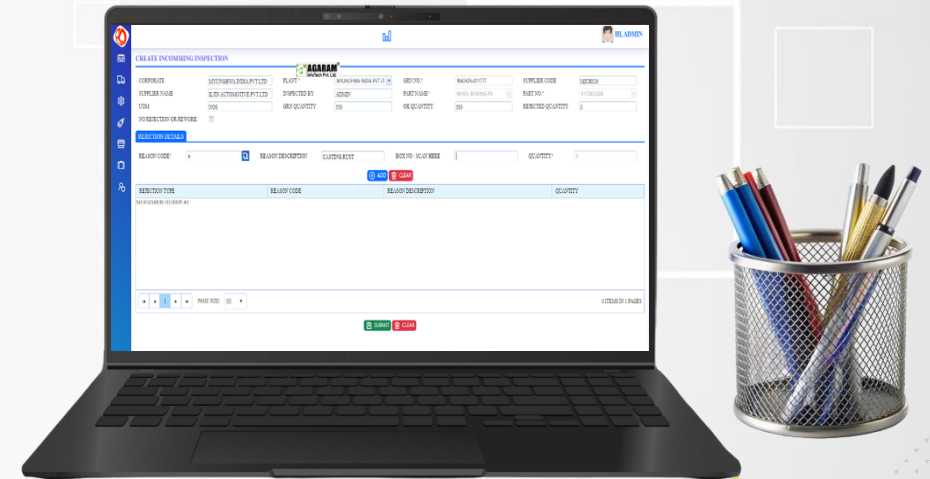

- Monitor quality during production stages
- Ensure adherence to defined standards

✓ Final Inspection

- Conduct final quality checks before dispatch
- Approve or reject finished goods

✓ Rejection & Rework Management

- Track rejected materials and rework processes
- Maintain records for quality improvement

SALES & DISTRIBUTION MANAGEMENT

A comprehensive module that manages the complete sales cycle from customer order to invoicing and delivery, ensuring accurate transactions, efficient order handling, and complete visibility of customer operations.

KEY FEATURES

✓ Order Management

- Create and manage customer orders with complete tracking
- Monitor order status and execution flow

✓ Invoicing & Billing

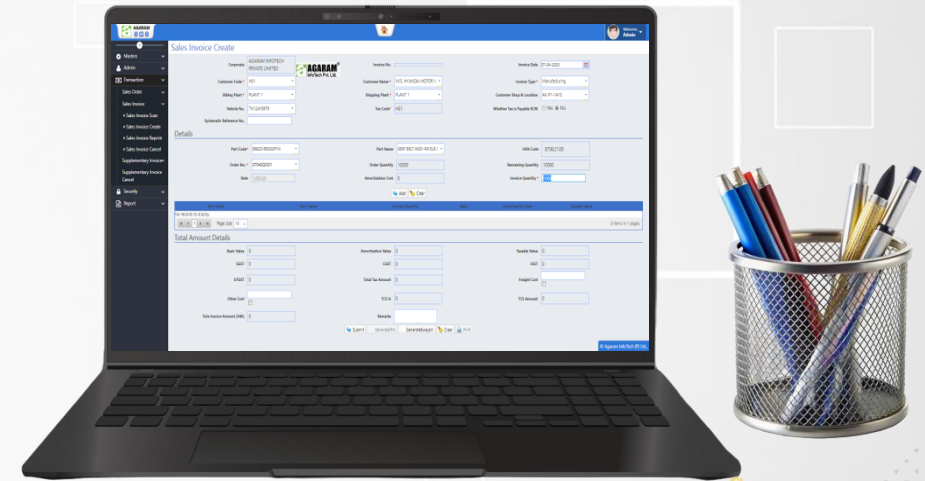

- Generate sales invoices and credit notes
- Handle customer and purchase rejection invoices

✓ Customer Stock Management

- Track customer end stock and material movement
- Maintain visibility of stock at customer locations

✓ Sales Transactions

- Manage delivery and sales-related transactions
- Ensure accurate billing and record maintenance

PLANT MAINTENANCE

A comprehensive module that manages equipment maintenance and service activities, ensuring improved asset performance, reduced downtime, and efficient maintenance operations across the plant.

KEY FEATURES

✓ Maintenance Configuration

- Define equipment service configurations and maintenance
- Set up maintenance schedules and service requirements

✓ Equipment Maintenance

- Track & manage equipment maintenance activities.
- Maintain complete history of service and maintenance records

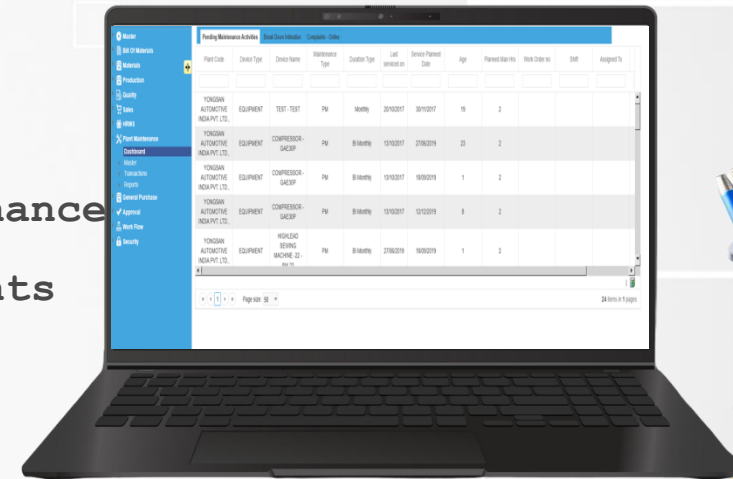

(Preventive, Periodic, Predictive)

✓ Issue & Problem Management

- Record and track equipment issues and problem intimation
- Ensure timely resolution through structured workflow

✓ Consumption Tracking

- Monitor material and spare consumption during maintenance

HUMAN RESOURCE MANAGEMENT SYSTEM

A comprehensive module that manages the complete employee lifecycle from attendance and shift management to payroll processing, ensuring accuracy, compliance and efficient workforce management.

KEY FEATURES

✓ Employee & Master Management

- Maintain employee and workforce master data
- Manage roles, designations and workforce structure

✓ Training & Appraisal

- Track employee training and performance appraisal

✓ Attendance & Shift Management

- Track employee and labour attendance
- Manage shift allocation and shift changes

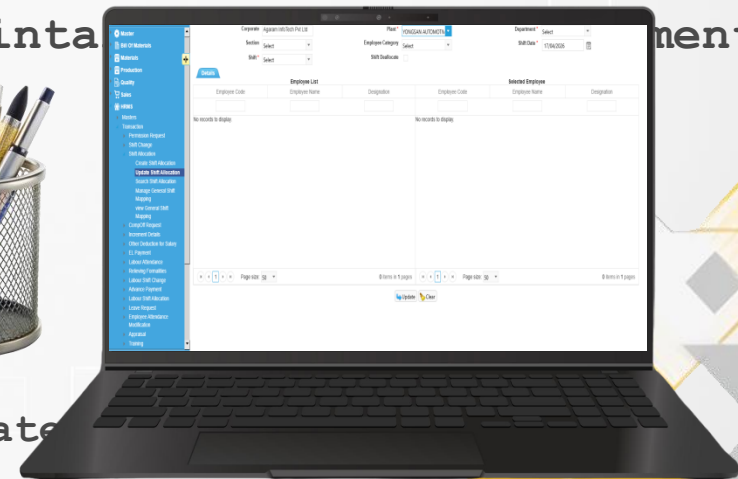

✓ Requests & Approvals

- Handle permission, leave and comp-off requests
- Approval workflow for attendance and payroll-related

activities

✓ Payroll & Salary Management

- Process payroll with earnings, deductions, and
