# BENEFITS

## INTEGRATED MODULES

From booking to balance sheet, all the processes are integrated within our distinctive products. With the streamlined modular view offered by the logistics management software and transport management system software our customers businesses prosper with good pace.

## EXECUTIVE DASHBOARDS

Our exclusive dashboards that exist within our transport software and logistics management software are powerful tools for executives because they summarize complex information and present it in an easily digestible way with which they understand their business.

## FULLY CUSTOMIZABLE

Growing globally, we match your business with a completely customizable solution involving the use of logistic software and transport management system software according to your needs. Our Product is enhanced to meet every facet of customer's operations.

## ON - SPOT NOTIFICATIONS

Stay happy, stay informed. AgES for logistics through the logistics software gives you the privilege of generating instant SMS and Email alerts for your bookings, deliveries and also helps in keeping track of the expiry dates of your important documents.

## FLEET COMPLIANCE

Our fleet management module within the transport software elegantly manages the strategic part of your business by centralizing the fleet and driver details thereby providing optimal solutions for daily issues.

## INSTANT TRACKING

With our AgES - Logistics, all you need to do is to click on the order number to keep a track of it and get notifications for the delays in deliveries with complete visibility.

We provide end to end solutions for their day to day operations. We have structured whole process to provide complete transparency to the management. We have also enabled a built in chat to have effortless communication between the departments to make their efforts more seamless.

### PROBLEM

*Lack of communication between the employees*

*Different medium of enquiries from the customers (Phone, Mail, Direct Enquiries)*

*Difficult to Track POD which is time consuming process*

### SOLUTION

*Built in Chat in ERP application*

*Provided an Enquiry Management Module with an option to view the communication history of the customers*

*Introduced Mobile application with instant POD upload option*

### BENEFITS

- *Seamless communication and file transferring helped them to connect better in order to alleviate the process*

- *Channelled the enquiry process, which helped to respond to the clients in effective and immediate manner*

- *Less time consuming process*
- *Immediate retrieval of POD*

**VERMA TRAVELS**  
Easiest way to travel

Transporting cargos in bus is their nature of business. We have provided an ERP system to maintain structured and viable rate contracts. An User friendly Android mobile application with Booking, Delivery and Consignment tracking provided to them, which all their employees have adapted to.

**PROBLEM**

**SOLUTION**

**BENEFITS**

*Not having centralized rate on Consignment Booking*

*Tariff module was introduced, where the rates can be defined for overall organization as well as individual customers*

• *Easy to retrieve rates at the time of booking consignment which is time saving process.*

*No provision to track the consignment*

*Implemented Android Mobile application to track the whereabouts of the consignment with proper alerts and notifications*

• *'On the go' tracking of the consignments. With the help of SMS alerts, customers and Verma Travels can verify the status without any hassle*

*Misplacement of documents and delayed renewal process*

*Fleet Management module introduced to overcome the document renewal process and document checklist are made mandatory before any transportation*

• *Penal charges are therefore minimized and on time renewal of documents takes place*

**We offered a complete platform to this logistics company to operate efficiently. There are various functional components in logistics application such as Tariff, Service Sales, Fleet Management, Maintenance, Purchase, Inventory, Asset Management, Insurance, Finance and Dashboard.**
